Full Stack Developer | Data Pipelines | Reporting Automation & Cloud Analytics

PROFESSIONAL SUMMARY

Full Stack Developer and MS Information Systems student at Northeastern University with hands-on co-op experience building full-stack internal analytics platforms, automated data pipelines, and cloud-based reporting systems. Skilled in React.js, Python, SQL, AWS EC2, S3, Redshift, CloudWatch, REST APIs, and ETL/ELT workflows. Built 12+ self-sustaining data pipelines and improved reporting efficiency for Account Management and Finance teams by 80%+ by automating manual reporting workflows. Strong background in data warehousing, business-facing applications, reporting automation, and cross-functional stakeholder collaboration.

WORK EXPERIENCE

Full Stack Developer Co-op
Apex Mobile Media

01/26 – 08/26

Toronto, Canada

- Built **12+ automated, self-sustaining data pipelines** ingesting campaign data from APIs, Amazon S3, email-based files, and partner sources into Amazon Redshift, with retry/backfill logic for missing data.
- Improved reporting efficiency for Account Management and Finance teams by **80%+ by automating manual workflows and reducing report generation from days to seconds**.
- Developed a **React-based internal analytics platform** with role-based access, live Redshift data retrieval, dashboards, and automated report generation to replace manual Tableau/spreadsheet workflows.
- Integrated campaign, sales, finance, and NetSuite data into Redshift, including 704 NetSuite tables, Closed Won/Closed Lost opportunities, sales-cycle data, impressions, video completions, and delivery metrics.
- Technical Skills: Python, SQL, JavaScript, React.js, Node.js, AWS EC2, Amazon S3, Amazon Redshift, Amazon CloudWatch, NetSuite, REST APIs, ETL/ELT Pipelines, Data Warehousing.

Software Engineer [Volunteer, Service-Learning Project]
Northeastern University

Toronto, Canada

- Developed and deployed a **menu-driven Flask chatbot** for Northeastern University's Toronto campus, hosting it on **Azure** with backend integrations to support student and newcomer information queries.
- Collaborated directly with stakeholders to define requirements and conversational flows, ensuring alignment with accessibility standards.
- Proposed and implemented an **Azure-based deployment strategy** that reduced infrastructure costs to **\$0**, meeting the project's strict budget requirement.
- Technical Skills:** Flask (Python), Microsoft Azure, REST API Integration, Cost-Optimized Cloud Deployment, Stakeholder Collaboration

SKILLS

- Languages & Frameworks:** Java, Python, C++, JavaScript, TypeScript, React.js, Angular, Node.js,
- Concepts:** Data Structures & Algorithms, Object Oriented Programming, Operating Systems, Cloud Computing, Calculus, Statistics
- Developer tools:** Git, GitHub, Postman API, Docker, SQL, NoSQL(MongoDB), MS Excel, Lucidchart, Visual Paradigm, Eclipse Papyrus
- Business Skills:** Requirements Gathering, User Stories, Use Case Diagrams, Process Mapping (BPMN), Business Strategy Alignment
- Soft Skills:** Stakeholder Communication, Collaborative Team Player, Business Process Mapping, Agile, Problem-Solver, Student Mindset

EDUCATION

Master of Science (MSc): Information Systems (College of Engineering)
Northeastern University

09/2024 – 09/2026

Toronto, Canada

Bachelor of Technology (BTech): Information Technology
Manipal Institute of Technology

07/2019 – 07/2023

Manipal, India
